

2010 GSC program
February 20, 2010 (Saturday)
 Skiles 249, School of Mathematics, Georgia Tech

9:00	Registration, poster setup, coffee, discussion		
9:15	Opening remarks		
9:30	Invited Talk	Michele Benzi Department of Mathematics and Computer Science, Emory University	Gaussian Quadrature, Functions of Matrices and the Analysis of Complex Networks
10:30	Invited Talk	Hongyuan Zha College of Computing, Georgia Institute of Technology	Low-Rank Factorization of Multiple Matrices and Probabilistic Models for Data Integration
11:30	Poster Session		
12:30	Lunch	Lunch is on your own, check dining options	Dining Options
2:00	Invited Talk	Alexandra Smirnova Department of Mathematics and Statistics, Georgia State University	The Gravitational Sounding Problem by Iteratively Regularized BFGS-Type Algorithm
3:00	Invited Talk	Alex Petukhov Department of Mathematics, University of Georgia	Underdetermined Linear Systems and Information Theory
4:00	Coffee Break	Poster Session	
4:30	Invited Talk	Yingjie Liu School of Mathematics, Georgia Institute of Technology	Central Schemes and Central DG on Overlapping Cells with New Developments on Hierarchical Reconstruction as the Limiting Technique
6:30	Dinner	Meal is not covered by symposium	Estimated cost \$20/person
